Performance Overview (2020–2023):

- 💰 **Total Sales:** ₹2.3M | **Total Profit:** ₹286.4K | **Profit Margin:** 12%
- 🛒 **Top Product:** *Alchemy* (₹56K profit, 0.5 margin)
- 📉 **Worst Product:** *SaaS Connect Pack* (–₹3.5K profit, 0.31 discount)
- 🏆 **Best Customer:** *Valero Energy* (₹10K profit, 418 units)
- 🌍 **Top Country:** *United States* (₹630K sales)
- 📊 **Leading Segment:** *SMB* (62% of total sales)
- 🏭 **Best Industries:** *Finance* (0.25 margin), *Energy* (0.17)
- 📅 **Strongest Sales Period:** Q4 2023 (₹0.65M sales, ₹88K profit)
- ⚠️ **Profit lagged behind sales** YoY, especially in 2023

Recommendations:

1. Promote high-margin products (*Alchemy*, *Site Analytics*); phase out loss-makers.
2. Limit discounts >0.2 to protect margins.
3. Strengthen *Strategic* and *Enterprise* segments (only 38% combined share).
4. Expand in high-potential countries (US, Japan, UK) and Finance/Energy sectors.
5. Control rising costs — profit growth not keeping pace with revenue.
6. Leverage high-performing quarters (like Q4 2023) for future planning.
7. Focus on repeat business from top customers and profitable regions.
